

# ARMODILO™ Surface Mount Swivel Template

The outer (red) holes are used for mounting the Surface Swivel add-on to any counter or surface. Print this template at 100% (do not scale printing) for the correct spacing of the mounting and cable pass through holes. 3/8" holes are required for the threaded studs to pass through.

Note: 1.75" threaded rods will fit a maximum counter depth of 1.5".
